## Profile

Junior web developer with a passion for creating user-friendly, impactful web applications. Skilled in front-end and back-end development, with a portfolio of projects that solve real-world problems. Experienced in building responsive web applications using modern frameworks and libraries. Eager to expand expertise and contribute to innovative projects in web development and beyond.

## Project Experience

### **Car Rental System**

- Built a web-based platform for renting and managing cars with real-time availability. Implemented booking, user authentication, and an admin dashboard for managing vehicles and rentals. Designed a responsive, user-friendly interface for smooth customer experience.

### **Amazon Clone**

- Developed an e-commerce UI with product listings and a working cart. Created a fully responsive layout using Material-UI and custom CSS. Focused on clean design, usability, and smooth shopping experience.

### **Netflix Clone**

- Built a Netflix-style React app using the TMDb API. Displayed movies with reusable components and a dynamic banner. Used React hooks for data fetching and state management.

### **Portfolio**

- My portfolio showcases my skills and projects in web development. Built with React, it features a clean and responsive design, smooth navigation, and an interactive user experience. The site highlights my best projects, complete with descriptions and GitHub links, and is optimized for performance.

## Education

**Bachelor of in Computer Science (BSC)**  
Unity University

2022/01 – present  
Addis Abeba, Ethiopia
